### **BOXEE COMING**

Boxee, a long-developing media centre platform known amongst media centre hackers for its ability to run on Apple's Apple TV as well as Windows, Mac, and Linux computers, has secured a product deal with networking vendor D-Link. The seemingly redundantly-named 'Boxee Box', due in the first half of 2010, will be made by D-Link and feature a hardware-based implementation of Boxee, which recently progressed from alpha to beta release and will, based on D-Link's release schedule, reach 1.0 stage early this year.
