

D-LINK SMART OFFICE SERIES

Business-Grade Smart Office Solution for Offices without an IT Department

A firewall router and a few Wi-Fi Access Points, set up in minutes and run from a single dashboard. Built for the small office or serviced business suite - no difficult setups, no consultants, no monthly management fees.

GUEST WI-FI

SET UP IN MINUTES

1-15 WI-FI ACCESS POINTS

NO IT TEAM NEEDED

ONE DASHBOARD

SECURE REMOTE ACCESS

— FOR THE SMALL OFFICE

The Whole Office Network, One Screen

A router, three or four access points, and nobody on staff who does IT for a living.

Most small offices don't have an IT department - they have an owner, or the one person who is good with computers. The Smart Office Series is built for exactly that. Plug in a DBR-700 or DBR-600-P, connect each access point with a single cable, and the router finds and configures them for you. Wi-Fi, guest access, firewall and staff VPN all live in one dashboard, set up in minutes.

ONE DASHBOARD

WI-FI ACCESS POINTS

FIREWALL & VPN

MESH ROAMING

01 Key Features

- ✓ The router manages the access points - nothing extra to buy, nothing extra to learn
- ✓ One cable per access point: the PoE model powers and connects them at the same time
- ✓ Set up and manage it yourself from any browser, in the office or from home
- ✓ Guest Wi-Fi kept separate from the office network in a couple of clicks
- ✓ Same Wi-Fi name everywhere - staff and laptops move around without dropping out
- ✓ Built-in VPN for staff working from home, without a separate security appliance
- ✓ Start with two access points and add more as the office grows

02 Where to Use

Built for small offices or home offices ranging from roughly two to twenty people, where the network is somebody's second job.

- The Ten-Person Office - one router, two to three access points, whole floor covered
- Serviced & Shared Suites - your own secure network inside someone else's building
- Clinics, Studios & Practices - Staff and guest Wi-Fi kept properly apart
- Growing Teams - easily add an extra access point when you add an extra room to your business

Business-Grade Networking You Can Run Yourself

Mesh Coverage and Centralised Management

Up to three DBR-X3000-AP units can be wirelessly connected as mesh nodes through the router's management platform, extending Wi-Fi coverage throughout an office, retail space or home without running additional cabling. Mesh operation minimises dead zones, and seamless roaming keeps devices connected as people move between access points.

Both the DBR-700 (up to 15 access points) and DBR-600-P (up to 10 access points) include AP management built in, giving a single dashboard to configure radios, monitor clients, and apply consistent Wi-Fi, VPN and firewall policies across the whole network.

MODEL	ROLE IN THE SOLUTION
DBR-700	Multi-WAN 2.5G Smart Office Series VPN Router - manages up to 15 DBR-X3000-AP access points
DBR-600-P	Multi-WAN 2.5G PoE Smart Office Series VPN Router - manages up to 10 DBR-X3000-AP access points
DBR-X3000-AP	AX3000 Wi-Fi 6 Smart Office Series Access Point - mesh node managed by DBR-700 or DBR-600-P

One dashboard, one policy set - wired connectivity, VPN security and wireless performance managed together, without separate wireless controller hardware.

The Routers

Both routers include built-in Wireless Controllers, providing seamless Wi-Fi Access Point management, Multi-WAN failover and a full VPN suite. Choose on port count, PoE and session capacity.

DBR-700

Multi-WAN 2.5G Smart Office Series VPN Router

KEY FEATURES

- ✓ Built-in management of up to 15 DBR-X3000-AP access points
- ✓ 1 × 2.5G WAN port + 1 × 2.5G SFP port for long-distance links
- ✓ Up to 7 × 2.5G LAN ports
- ✓ Multi-WAN with load balancing and automatic failover
- ✓ Firewall + IPsec | OpenVPN | WireGuard VPN
- ✓ Rackmountable desktop design

SPECIFICATIONS

WAN Ports	Up to 3 (incl. 2.5G SFP)
LAN Ports	Up to 7 × 2.5 Gigabit
Firewall Throughput	2450 Mbps
Concurrent Sessions	200,000
Dimensions	126 × 280 × 44 mm
Warranty	Limited Lifetime

DBR-600-P

Multi-WAN 2.5G PoE Smart Office Series VPN Router

KEY FEATURES

- ✓ Built-in management of up to 10 DBR-X3000-AP access points
- ✓ 1 × 2.5G WAN port; up to 8 × 2.5G PoE LAN ports (120W budget)
- ✓ USB 3.0 supports D-Link 4G/5G dongles for WAN backup
- ✓ Multi-WAN with load balancing and automatic failover
- ✓ Firewall + IPsec | OpenVPN | WireGuard VPN
- ✓ Compact desktop design

SPECIFICATIONS

WAN Ports	Up to 2 × 2.5 Gbps
LAN Ports	Up to 8 × 2.5G PoE
PoE Budget	120 W
Firewall Throughput	2000 Mbps
Concurrent Sessions	65,000
Dimensions	120 × 190 × 38 mm
Warranty	Limited Lifetime

The Access Point

A single AX3000 Wi-Fi 6 access point model covers the whole range - add as many as the office needs, all managed from the router. One PoE cable per unit, wall or ceiling mounted.

DBR-X3000-AP

AX3000 Wi-Fi 6 Smart Office Series Access Point

KEY FEATURES

- ✓ Centralised management via DBR-700 or DBR-600-P
- ✓ AX3000 Wi-Fi 6 - speeds up to 3Gbps, dual-band 2.4/5GHz
- ✓ 1 × Gigabit PoE LAN port - one-cable install
- ✓ Wall or ceiling mount; mesh technology extends coverage
- ✓ Seamless roaming; WPA3 Personal/Enterprise encryption
- ✓ Guest Wi-Fi (Guest Zone); VLAN tagging; up to 7 SSIDs

SPECIFICATIONS

Wi-Fi Configuration	Wi-Fi 6 AX3000
Bands	2.4 / 5 GHz Dual Band
LAN Interface	1 × Gigabit PoE
Operation Modes	AP WDS WDS+AP
Security	802.1x WPA/WPA2 WPA3
Number of SSIDs	7
Dimensions	170 × 170 × 34 mm
Warranty	Limited Lifetime

ONE CONNECTION - INFINITE POSSIBILITIES

Backed for Life..

Every D-Link Smart Office Series router and access point ships with Limited Lifetime Warranty, Next Business Day Advanced Replacement, and access to a dedicated SMB technical support team, at no extra cost.

Hardware covered for life

For the operational life of the product, in the country of original purchase.

Replacement ships first

Next Business Day shipment of a replacement unit before you return the faulty one.

Local SMB tech team

Australian team for setup, troubleshooting and configuration at no extra cost.
