

The Avenue Apartments, Darwin

A scalable HD IP Surveillance Solution providing high level security for The Avenue's commercial, retail and residential spaces

"By using D-Link cameras and switching we were able to increase both the number of cameras plus the total amount of storage for greater total coverage at The Avenue in a particularly efficient and cost effective way."

— Michael Bailey,
Synergy Managed Services.

Background

Client: Osborne Family Holdings (OFH) are the owners of new, high quality apartments called 'The Avenue'. The Avenue - Stage 1 consists of 150 new apartments built over thirteen levels with mixed commercial and retail use.

Challenge: The Avenue build presented an array of challenges, mostly to do with sharing residential, commercial and retail spaces. Within the mix of spaces there was a requirement for high level security for The Avenue's government clients and crèche. There was also the building's street exposure to manage alongside significant car parking security for residents, commercial tenants and retail visitors. Finally provisions had to be made for the expanding environment and the addition of stage 2 of the build, consisting of another 150 apartments over 13 levels with mixed commercial and retail use and stage 3, a further 200 apartments plus 100 hotel rooms again covering commercial and retail.

Overview

The Osborne Family Holdings specified a requirement for a high definition IP Video Surveillance and Network Switching solution. The range of cameras needed to suit each individual location and be PoE powered, as well as link up with a camera recording and analytics system. The system also had to provide a scalable storage solution and a scalable camera solution for stages two and three. Finally, The Avenue's owners wanted one brand to offer both Network Switches and an IP Camera solution with a Limited Lifetime Warranty that included Advanced Replacement. As a result IT reseller Michael Bailey from Synergy Managed Services recommended a D-Link solution that was installed by systems integration specialists Controlability.

The Solution

Through Synergy Managed Services, an IT reseller that boasts a long and successful relationship with D-Link, D-Link were able to provide a full end-to-end high definition IP Video Surveillance and Network Switching solution.

In addition D-Link could offer the Limited Lifetime Warranty that included Advanced Replacement, two features that no other IP camera brand is offering.

The Outcome

"By using D-Link cameras and switching we were able to increase both the number of cameras plus the total amount of storage for greater total coverage at The Avenue in a particularly efficient and cost effective way." – Michael Bailey, Synergy Managed Services
